## ABOUT ME

Web & Multimedia Developer with a Bachelor's degree in Information Technology and hands-on experience developing websites from WordPress-based implementations to fully custom-built websites. I combine front-end development fundamentals with strong graphic and UI design skills to deliver responsive, user-focused digital experiences. Proficient in HTML, CSS, JavaScript fundamentals, and basic PHP, with experience supporting government, business, and remote teams.

## EXPERIENCE

### Web & Multimedia Developer + Information Staff

Local Government Unit of Daet | 2025 – Present

- Maintained and updated the existing WordPress website
- Rebuilt and transitioned the website into a custom-built solution using PHP
- Built dynamic page components using PHP
- Assist with UI visuals for public information dissemination
- Ensure consistent branding and accessibility in digital content
- Integrated public information content, announcements, and visual assets

### Design & Order Processing Assistant

Rakrisa & Co (US-based) | 2024 - 2025

- Updated PSD product image templates using provided assets
- Followed strict layout, file naming, and export instructions
- Ensured accuracy and consistency across deliverables

### Graphic Designer & Social Media Manager

888RV Construction Company

- Created Canva and Photoshop designs for social media and print
- Managed Facebook page visuals and content
- Assisted with event documentation and live coverage
